Quarto Crash Course

Can render from cli with

```
quarto render cli-params.qmd -P name:Helen -P data_filter:drama
```

Example header

Here is some text about dragons. So interesting, don't you think. They are such beautiful creatures.

(a) A bird

Here is some text about birds. So interesting, don't you think. They are such beautiful creatures.

Here is some text about birds. So interesting, don't you think. They are such beautiful creatures.

Example header 2

```
print(name)
print(data_filter)
```
